Information Technology Support Technician

The information technology (IT) support technician assists users with IT troubleshooting, training and installations. The position also increases user knowledge of desktop software and systems; increases efficiency and reduces duplication of effort; and maximizes usefulness of software and equipment.

Duties

**Essential Functions:**
- Provide excellent customer service to members, guests and coworkers.
- Ensure a clean and safe environment.
- Know and embrace the club mission statement and customer service standards.
- Maintain hardware and desktop software standards for all users.
- Troubleshoot hardware problems; resolve directly or refer to outside maintenance provider.
- Troubleshoot software problems; resolve directly or refer to outside maintenance provider.
- Install, upgrade and retire hardware and software.
- Determine and implement optimum software configurations for user workstations.
- Manage user desktop support and training for Windows, word processing, spreadsheet, email, Internet and presentation graphics software.
- Provide user training for desktop software including one-on-one and computer-based training.
- Maintain system and data security, access control and anti-virus initiatives.
- Manage email and Internet access systems.
- Enhance technical proficiency with ongoing professional training.

**Additional Job Duties:**
- Special projects as assigned by management or ownership.

Information Technology Support Technician *(continued)*

**Job Requirements**

**Required:**
- Bachelor’s degree in information technology or related fields, or technical degree.
- 1-3 years of experience as an IT technician.
- Excellent communication, presentation, documentation and project management skills; ability to manage multiple projects and job assignments.
- Mobile device technologies, digital cameras and scanners.
- Hardware troubleshooting and upgrade experience.
- Understanding of the relationship between RAM, processor speed and hard drive space and how it affects the performance of the computer.
- Ability to regularly stand, walk, and lift and/or move up to 50 lbs.

**Preferred:**
- Exposure and management of hybrid, networked environments using current, appropriate technology.
- Desktop support and maintenance of Windows Professional operating systems.
- Printers and printing technologies: troubleshooting printing problems.
- Scanning and scanning technologies: troubleshooting and ability to train users.
Director of Information Technology

The director of information technology maintains network operations and security; increases user knowledge of desktop software and systems; interfaces with equipment and software vendors; reduces inefficiency and duplication of effort; and maximizes usefulness of software and equipment.

Duties

Essential Functions:
• Contribute to the development of specific area operating policies, programs and/or procedures consistent with the club’s general policies and strategic direction and objectives.
• Work closely with senior managers, supervisors and staff to provide strategic IT planning and services.
• Manage network and POS infrastructures.
• Maximize performance and reliability of network operations.
• Maintain system and data security, access control and anti-virus initiatives.
• Manage email and Internet access systems.
• Maintain hardware and desktop software standards for all users.
• Interface with outside vendors as needed to support existing and new technologies.
• Install and/or upgrade new hardware and software.
• Determine and implement optimum software configurations for user workstations.
• Maintain and coordinate hardware warranty and maintenance relationship with outside vendor(s).
• Troubleshoot hardware problems; resolve directly or refer to outside maintenance provider.
• Manage user desktop support and training for Windows, word processing, spreadsheet, email, Internet and presentation graphics software.
• Provide user training for desktop software including one-on-one and computer-based training.
• Enhance technical proficiency with on-going professional training.
• Implement disaster recovery, back-up procedures and information security and control structures.
• Prepare the annual budget, schedules, and expenditures; analyze variances, and initiate corrective action as needed.
• Supervise and manage information technology staff including: interviewing; selecting and training staff; planning and assigning work; and appraising performance, rewarding and disciplining staff.
• Provide excellent customer service to members, guests and coworkers.
• Ensure physical areas are well appointed, clean and maintained.
• Ensure compliance with all applicable health and safety standards and regulations.

(Description continues on page 5)
Director of Information Technology (continued)

Additional Job Duties:
• Special projects as assigned by management or ownership.

Job Requirements

Required:
• Bachelor’s degree in information technology from accredited four-year college or university.
• A proven track record, with a minimum of 4 years in a supervisory or management capacity at a private club, sport/recreation facility or equivalent service-related field.
• Excellent communication, writing, public speaking and negotiation skills.
• An approachable personality with strong leadership and ambassadorial skills.
• Installation, configuration and administration experience on desktop, laptop, tablet, hardware and operating systems.
• Installation, configuration and administration experience with managed and unmanaged wireless products including routers, bridges and access points.
• Installation, configuration and administration experience with networking switches, virtualized subnets, fiber cabling and connectors.
• Ability to work cooperatively with key team members, departments and vendors.
• Committed to learning by keeping current with all emerging IT technologies through relevant blogs, webcasts, online tutorials, conference and workshop attendance.
• Possesses passion, integrity and energy.
• A team player who can lead, organize, engage and train staff effectively.
• Proven ability to enhance performance, through effective delegation, goal setting, coaching, empowerment, and recognition.
• High standards of ethics, honesty, and integrity.
• Strong business acumen complemented by financial and entrepreneurial skills.
• Ability to work in a variety of environments and to stand, walk and climb as needed.
• Must be on call, able to work nights, holidays and weekends as needed.

Preferred:
• Advanced degree in information technology preferred.
• Previous experience in club or hospitality related information technology.
